***Restriction Requirement***

In view of applicant's latest amendment, the differences between the gas turbine engine in claims 14-27 and the diffuser in claim 28 have become more pronounced. A restriction between these two inventions is therefore now considered proper.

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 14-27 drawn to gas turbine engine with a diffuser (combination) classified in Class 60, subclass 251, and
- II. Claim 28 drawn to a diffuser (subcombination) classified in Class 138, subclass 139.

The inventions in Groups I and II above are distinct because the gas turbine combination of Group I does not require all pertinent details of the diffuser subcombination of Group II. This conclusion is supported by applying claim 14 as an evidence claim; see MPEP 806.05(c)(II)(B). Furthermore, the Group II diffuser has separate utility from the Group I engine since the diffuser could be used in air intakes for other types of combustion devices such as, for example, industrial furnaces or pressurized combustion boilers,

Because these inventions are distinct for the reasons given above and require separate classification and/or divergent fields of search, restriction for examination purposes as indicated is proper.

Applicant is advised that even in the event that the restriction requirement is traversed, the response to this requirement to be complete must include an election of the invention to be examined. (The undersigned was unable to make contact with applicant's attorney for the purpose of offering the option of a telephone election, hence, this action is being made as a written restriction requirement.)
